BUILDINGS®**

66' x 14' x 88' parlor barn with 30' x 5' alcove • 36' x 14' x 90' holding area • 96' x 11' x 264' freestall barn • #1512/#41-3051

A Building that Works for You

You take pride in your dairy operation and want a building that meets your daily requirements so you can continue to provide quality products to your customers. For over 100 years, Morton Buildings has delivered quality and customer service to people looking for durable, versatile buildings. Our roots are in the agriculture industry and we are proud to continue serving those who feed our nation everyday. From our sales consultants to our construction crews and every step in between, Morton Buildings will work with you to answer questions and offer advice to help your building project run smoothly. We know your business cannot stop to oversee new construction and that's why we provide personalized service to fit your needs.

Whether adding onto an existing facility or starting new, you want your building to work as efficiently and effectively as you do. Morton Buildings Sales Consultants have the experience to guide you through the building process. The needs of your facility are important in choosing the type of building you want. Morton offers everything from freestyle barns, calving barns and milking parlors to feed storage, office space and sale barns. Your sales consultant can help you choose the layout that is right for you and your business. Morton can also work with your equipment manufacturer to ensure your building allows your milking equipment to be positioned in a layout that provides maximum convenience and efficiency.

"We knew that this building would last a long time just looking at the quality of the materials going into it. Probably the best part about working with a strong national [company] is the people who come to your farm, build the building, and are conscientious and do a good job. We're really happy with the job that we got and we're happy with the materials that are in that building."

Joel K., Woodstock, IL
Kooistra Dairy Facility

30' x 10' x 80' • #1296/#91-1803

48' x 11' x 75' • #3296/#59-1352

98' x 13' x 880' • #2272/#91-3270

Interior options that keep your cows healthy

Flexible layouts that keep your business efficient

Features That Add Function

Ventilation is a key factor in any dairy operation. For the comfort of you and your cows, Morton offers natural and power ventilation options. Sidewall curtains allow for natural ventilation to keep your animals healthy and your building comfortable. Power ventilation and Morton's exclusive Energy Performer® insulation package or Thermax® insulation can help you better control the climate inside your facility. If noise is an issue, you can also add Morton Buildings Hi-Rib™ Acoustical Steel to reduce machinery noise. Your sales consultant can help you choose the placement of doors, windows and stalls to ensure the most efficient and safe working environment for you and your animals.

While the function of your building and the health of your animals is vital, you may also consider the appearance of your new building. Morton offers many exterior features including low-maintenance Hi-Rib™ steel in a variety of KYNAR 500® colors as well as brick and stone. You can add overhangs, porches or cupolas to complete the appearance of your building.

A Company That Stands Behind You

Morton stands behind your building with one of the strongest, most comprehensive, non-prorated warranties in the industry. We use easy-to-understand language that informs, not confuses our customers. From the planning stages to the completion of your building and beyond, Morton stands by our customers and our product.

"In the whole project, Morton was the only company that was involved that got all the work done by the deadline that we had planned on."

Harm S., Heartwell, NE
Halimage Dairy Farms

Features and Options

Various Ventilating Ridges

Control the climate in your building with open ridge, raised ridge and 4' & 10' ridgetators.

Overhead Doors

Our approved suppliers provide heavy-duty overhead doors that are easy to use and made to last. Available in a limited number of colors to complement your building.

Lam-Ply Trusses by Starwood Rafters, Inc.

Can be spaced at 12' on center with 2/6 recessed purlins. Trusses and rafters have solid plywood webs to eliminate bird nesting areas.

Open Sidewall Overhangs

Side overhangs supply incoming air to the continuously vented ridge. This natural airflow carries heat and moisture out the vented ridge, providing a drier environment.

Splashboard

Installed on the interior of your building to protect your animals and prolong the life of your building.

18" & 24" Truss Heel

Trusses are set in the saddle of custom columns and fastened with 1/2" through bolts to eliminate knee braces.

Wall Liners

Provide an easy-to-clean, long-lasting interior finish. In your choice of fiberglass plastic, ceramic tile, glazed block, non-toxic epoxy paints and hi-plank plastic.

Ventilation Curtain Systems

Ventilation curtains allow walls to be open for maximum cow comfort. Curtains can be closed in inclement weather to protect building and livestock.

Heavy-Duty G-90 Gusset Plates

Heavy-duty gusset plates are added for strength and corrosion protection on our standard MBI truss barns.

Building Across the Nation

With company-owned construction centers strategically located throughout the United States, there's a Morton Buildings Sales Consultant nearby available to serve you.
